

THE UNSEEN THREAT OF THE MAPPING PROJECT

A new website has been brought to light - a pure, unadulterated threat to Jewish life sponsored by the antisemitic pro-Palestinian BDS movement, is being promoted by anti-Israel groups such as Boston BDS and the left-wing nonprofit Massachusetts Peace Action. Showing ties between various Massachusetts institutions and "support for the colonization of Palestine" has raised alarms over its dangerous targeting of the Jewish community.

This map represents the truth behind the movements that have co-opted Jewhatred as a social justice endeavor. From the left and right alike, these threats are real, even if unseen.

As the dangers rise around us, we can assume that this is not likely the only map of its kind. We hope you will share this resource widely to encourage others to be informed about the unseen threats we face.

FOR CONSIDERATION OR DISCUSSION:

- Do you believe this map serves as clear evidence of a threat against Jewish communities and institutions?
- What would you want to see happen in the aftermath of this map's publication?
- Do you think that those associated with the creation of this map should be held legally accountable for incitement?
- Why do you think this ISN'T being taken seriously?
- A similar map of Jewish youth activities has since been discovered - apparently from within a high school network. Should we be talking to our children about this? How can we do so without making them live in fear?
- Why do many ignore the blatant hatred of the BDS ProPalestinian Jewhatred movement?
- Does this map make you afraid? If so, how are you coping with that fear?
- What more do you think we should do to fight the spread of the threats against Jews?
- How could we reach do more to aise awareness of the dangers of this map, and the others that are likely in existence?

TOGETHER WE CAN DO MORE TO FACE THE HATE
